The WalkEZstore

## The WalkEZ Way:

Our unique and better impression process, we call The WalkEZ Way, is used to make your custom orthotics, is designed to get your foot into a correct position to promote heel strike and fore-foot loading, and is why our products truly work.

No messy plaster casting. No mathematical formulas to get wrong. No locking up the foot to keep away the pain. That doesn't work, it just creates atrophy or weakened muscles over time.

Our process allows your feet to tell us what they want to be - more bio-mechanically functional. Function is motion and proper motion is better health. Our products can improve your foot health in about six months to a year.

## DESIGN

We fabricate all of our orthotic products customized to the shape of your foot. Our products fit any type of footwear you need or want to wear including casual, sport, work, dress, sandals, and all types of boots and slippers.

## FUNCTION

Our orthotics help keep your feet in proper alignment to improve your gait. They deliver better balance and stability because they help to align your heel, better support your midfoot, and offers relief to your feet helping you feel good all over.

Not sure where your feet stand?  
Come for your analysis.

## PREVENT AND PROTECT

We believe that our products will improve your biomechanical function. Our system functions for proactive health and reactive care such as plantar fasciitis and bunions so no matter your current health, we are ready to help.

We are foot pain specialists!
